

NGUYEN TRUNG HAU

FRONTEND DEVELOPER

Phone: 0937196366
Date of birth: 10/2005
Address: Binh Hung Hoa A, Binh Tan, HCM
Email: n.t.hau005@gmail.com

TARGET

Final-year Information Technology student seeking a Frontend Developer position to build scalable and user-centered web applications. Proficient in implementing frontend logic, optimizing user experience, and developing responsive interfaces using modern frontend technologies. Eager to apply problem-solving skills and continuously grow in a professional development environment.

EDUCATION

09/2023 - 09/2027

Vietnam Aviation Academy

Major : Information Technology

Final year student majoring in information technology.

SKILL

Frontend Development:

Html, Css, Javascript, Typescript, Angular, Material UI, Ionic

Architecture & Best Practices:

Component-based architecture, Modular structure, Lazy loading, Service pattern, API abstraction layer

Database & Storage:

MySQL, MongoDB, Cloudinary

Tools & Workflow:

Git, Github, Fork, Postman, Notion, Figma

PROJECT

04/2025 - 06/2025

PONPLAN - PERSONAL & FAMILY FINANCE MANAGEMENT APP

Project Description & Key Features

- Web/mobile expense management app using a card-based system.
- Supports balance tracking, expense recording, monthly summaries, and visual dashboard by time/category.
- Enables structured expense classification for better planning.

Responsibilities & Contributions:

- Designed system architecture and core workflows.
- Developed UI with Angular/Ionic and implemented expense/balance logic.
- Built MySQL schema (Django Models) and Django REST APIs for frontend integration.

Github, Tech & Role:

- Link: <https://github.com/trunghau05/ProjectPonPlan>
- Tech: Angular, Ionic, Django, MySQL.
- Role: Fullstack Developer.

09/2025 - 11/2025

VITDAILY - PERSONAL & TEAM TASK MANAGEMENT PLATFORM

Project Description & Key Features:

- Web app for personal notes, individual tasks, and collaborative team workspaces.
- Uses MySQL for personal data (structured, consistent storage) and MongoDB for team workspaces/tasks (flexible, scalable).

Responsibilities & Contributions:

- Designed system architecture and database strategy based on business needs.
- Developed user-friendly frontend and implemented client-side logic for notes, tasks, and workspaces.
- Designed MySQL schemas with Django Models and structured MongoDB data for team features.

Github, Tech & Role:

- Link: <https://github.com/trunghau05/ProjectVitDaily>
- Tech: Angular, Django, MySQL, MongoDB.
- Role: Frontend Developer, Project Lead.
